

# Lamps for infrared cabins

Philips infrared halogen lamps

**PHILIPS**

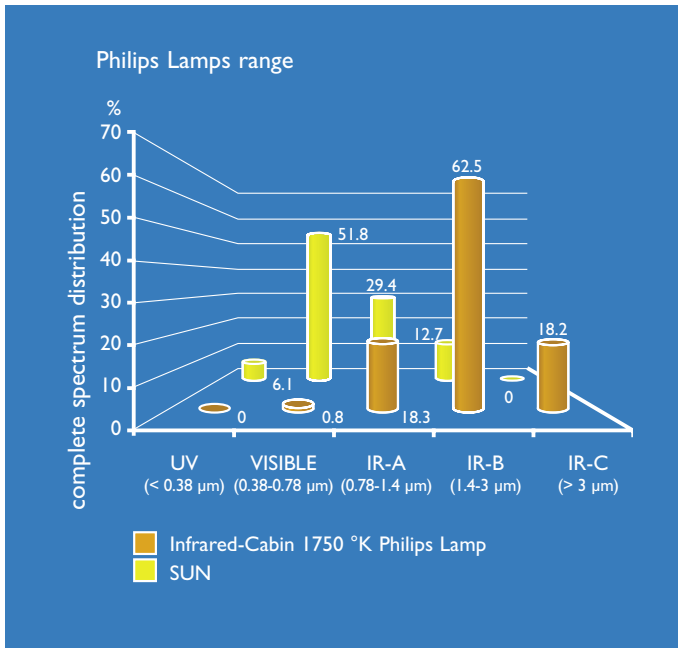

# Enjoy the benefits of infrared in your cabin

Philips infrared halogen lamps are designed for body relaxation applications such as infrared cabins. These lamps are based on Philips' world-leading technology, allowing operators to deliver a better and faster service, more conveniently, in less space. Philips infrared lamps deliver the optimum balance across the infrared emission spectrum (see graph: Philips lamps emission spectra).

The lamp emissions reach the subcutaneous layer of the skin (see graph: Depth of penetration into the skin), where heat is dissipated more efficiently. This gives a more diffuse and pleasant warming effect. Philips lamps provide direct body heating, matching the characteristics of the skin.

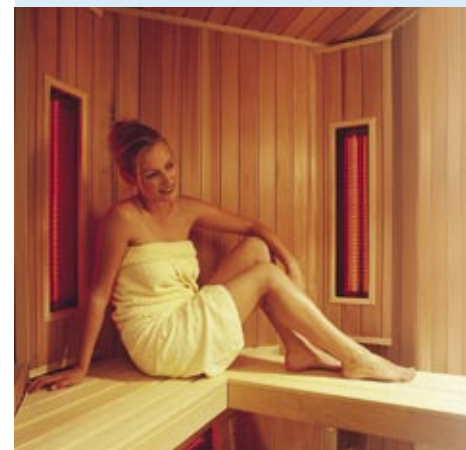

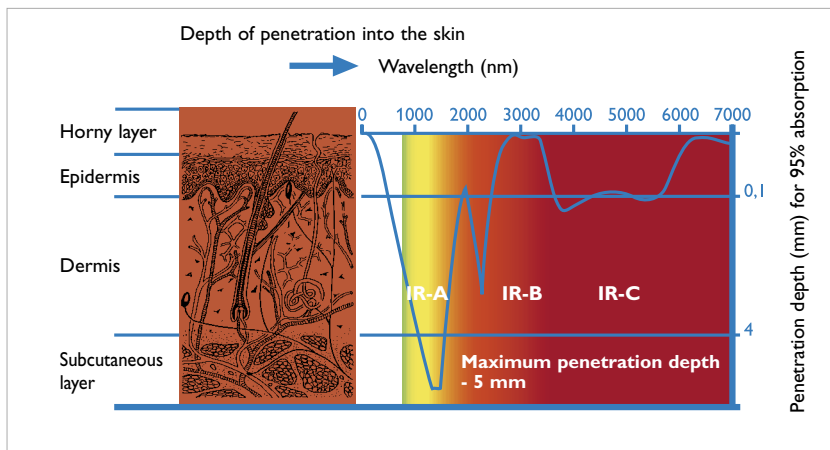

## Infrared cabin lamps for comfort and well being

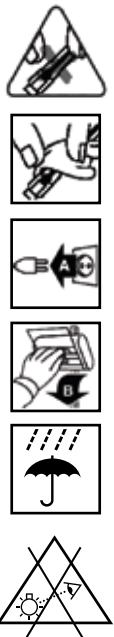

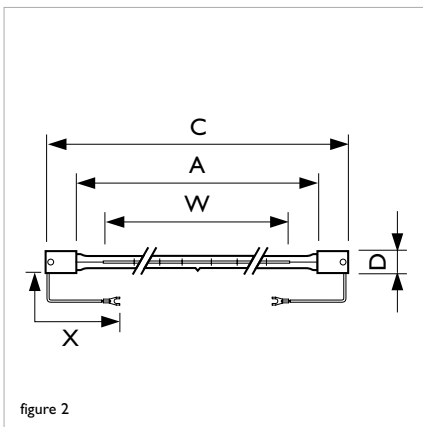

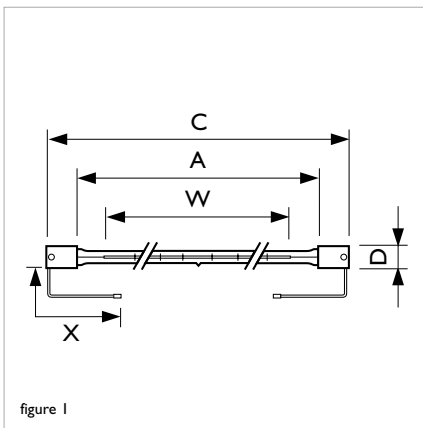

Features	Benefits
Short-wave technology	Optimal penetration into skin and muscles for an ultimate result
Instant heat	No preheating needed for shorter, more effective sessions and higher energy efficiency

## Applications

- Infrared cabins

## Philips infrared halogen lamps
