Superior Heater Technology

Our Far Infrared heaters combine Carbon and Ceramic to produce healing infrared heat that is unmatched. Our heaters are comprised of micro-thin carbon fibers (1/1000th the thickness of a human hair) combined with our patented ceramic compound.

We start with a high quality organic carbon fiber sheet. Then we add our high output (high emissivity) ceramic compound, which produces long wave infrared heat unequaled by carbon heaters alone.

Lastly, the majority of EMF is canceled out, making the Curve the safest and most effective sauna dome available.

Easy Storage

The Curve Sauna Dome is comprised of two lightweight dome shaped sections that make it very easy to store in a corner or the closet.

Seven Year Warranty

The Curve Sauna Dome is made from the highest quality materials to ensure a lifetime of use, and is the only dome sauna backed by a seven year warranty.
